BASIC FEATURE UPDATE DASHBOARD

CUSTOM SCRIPTS | THE REGISTRY TATTOOS

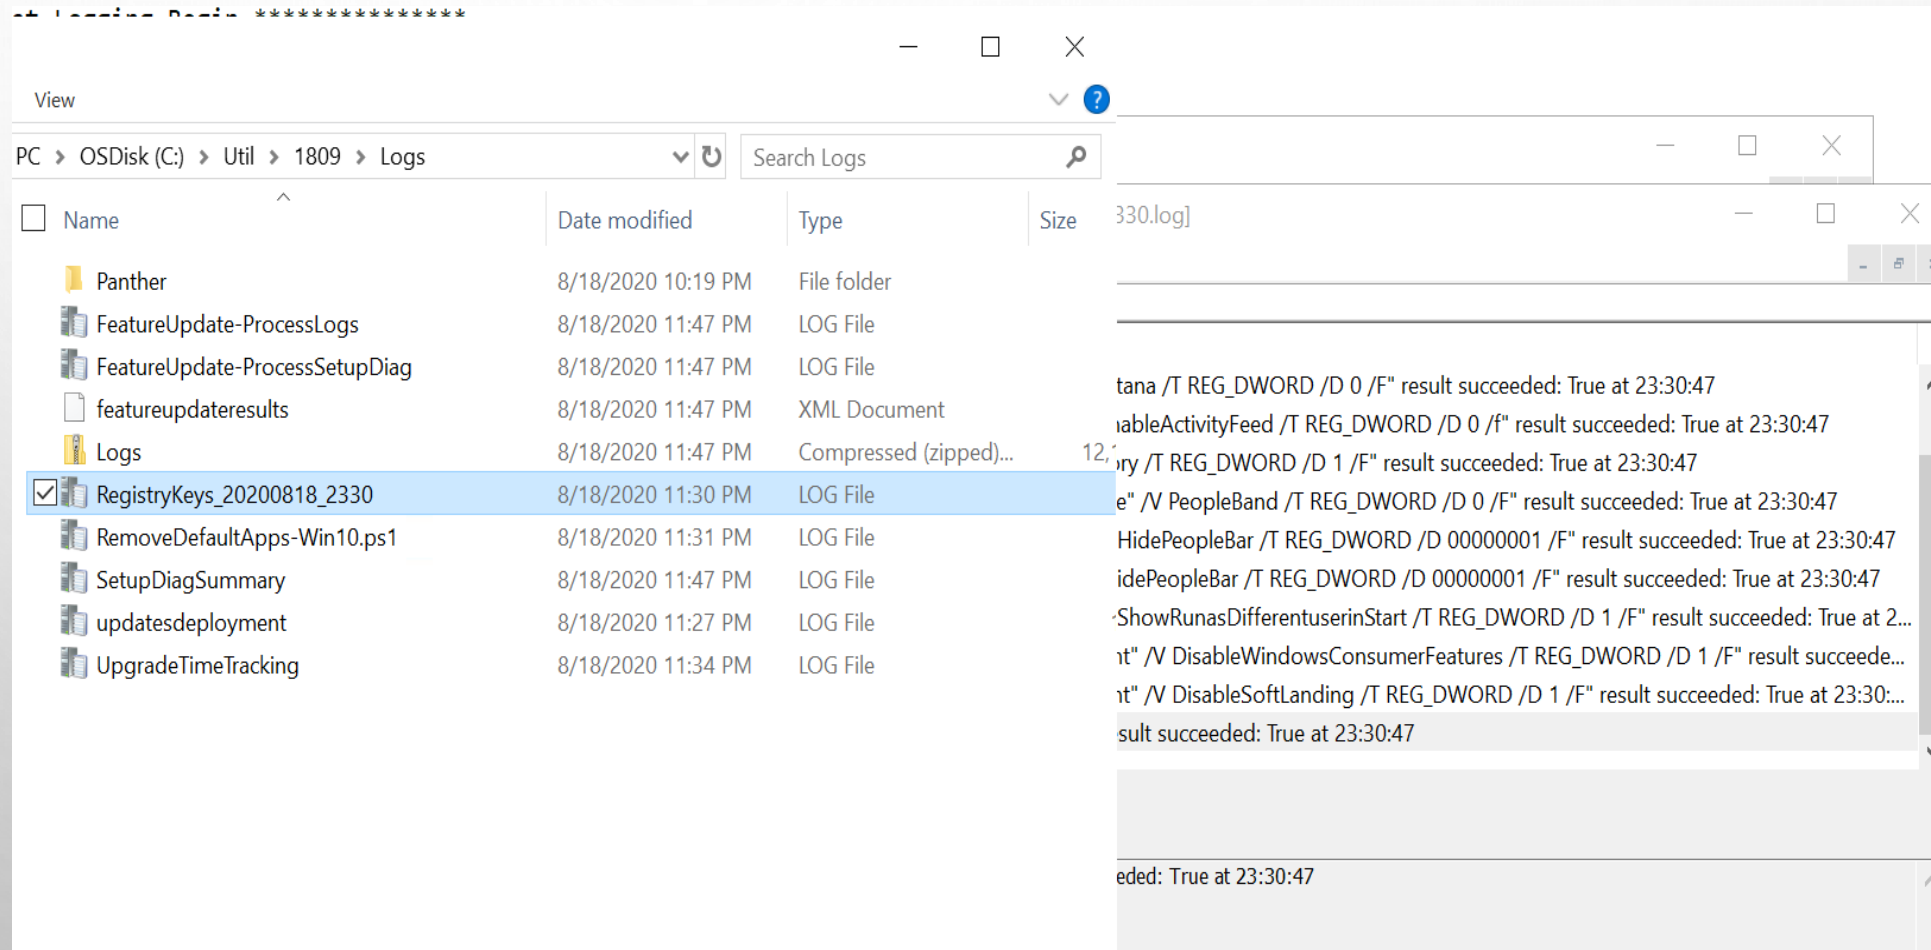

There isn't enough canned reporting for servicing so we are running custom scripts that will tattoo useful information into the registry for reporting.

CUSTOM SCRIPTS | THE LOG FILES

There isn't enough canned reporting for servicing so we are running custom scripts that will also create log files in specified locations to be used for troubleshooting if needed.

OLD REPORTS, BUT YOU GET THE IDEA

Some reports are only purposed for tracking migration status by department

Other Reports are purposed for being able to provide information for quickly identifying why a system didn't upgrade, as well as other pieces of actionable intelligence.

OLD REPORTS, BUT YOU GET THE IDEA

We have the ability identify the systems we were automatically able to remediate. These were before going to be touch labor devices. By knowing the costs associated with hardware replacement we can provide another show of value to the customer highlighting how much touch labor cost savings is experienced.
